

Student Testimonials and Successes

What our students have to say

"I'm really enjoying my time on the course; I get to learn all aspects of engineering that will help me where I'm currently working and when I want to progress onto a higher course."

Jack Ingram: Engineering student and Young Apprentice of the Year.

"The staff here are brilliant and treat everyone as individuals. It's been really hands-on already."

Olivia Richards-Smith: Engineering student

"The environment isn't too regimented, like school is, it's a more professional environment where we're treated like working adults - which makes working easier."

Sam Edwards: Engineering student

"I'm impressed with the facilities, big classrooms and computers, and it's specifically tailored to Marine technology. It's good that The College invests money into the industry and all of our tools are new."

George Bloomfield: Marine student

"This is a fantastic opportunity for me to show The College and Westover Toyota what I can really achieve. I can't believe my luck."

Ashley Metcalf: Motor Vehicle student

Employer testimonials

"Our link with the College through the Marine Technology Centre is a great move, as it helps to ensure we continue to grow and develop the expertise and training that our apprentices receive both at a craftsmanship level and higher technical level."

Alex Bowman: Sunseeker International Training Manager
