Everything IT
Learn relevant skills for the workplace
Studying Everything IT at The College prepares you for the exciting and diverse world of IT

You'll gain relevant skills and an IT industry-recognised qualification, giving you the best chance of finding a job in the sector or continuing your studies.

By learning a core of IT knowledge, you can go on to a whole host of jobs, from forensic computing and IT security to database administration. There are plenty of opportunities locally and nationally within the sector too.

To make sure you get the best experience possible to prepare you for work, you will get the chance to work for The College's IT Helpdesk or Media and IT section. We also work closely with major local employers such as IBM, who organise guest speakers, workshops and a speed interview event.

Our experienced and specialist lecturers have won 'Teaching Team of the Year' so it's no surprise that our pass rate has been over 90% for the past three years.
