Computing and IT

Could this be you?

If you want to learn the skills to go into computing or data science, web development or cyber security, study with us. Over 95% of our students progress to Higher Education or into work.

With access to 5 dedicated IT suites (that's over 100 PCs!); you'll get to work with software such as MS Project, Adobe suite, 3D Studio max, Unity, Python, Visual Basic and Dreamweaver.

You'll also get great work experience and make useful contacts within the industry by taking part in live business-led projects. Recently, our students have worked on QR coding for Bournemouth's libraries and developed several websites for local companies.

We have regular guest speakers from industry such as EA Games and Double Negative and there is the opportunity to visit gaming studios, IBM, Siemens, and exhibitions such as Bournemouth University's Innovation Design Show.
