## Work Experience

Skills and experience for your future

Our students leave with more than just qualifications

At our College, our Full-Time courses are focused on giving you the best start in your future career. A central part to this is work experience. It will help you understand both the industry you're training for and even more importantly, the wider skills you need to succeed in work.

Work experience can take many forms, but essentially you'll complete one of two types of work experience - an industry placement, or a work placement.

Work experience is a key part of studying at our College. We want our students to benefit from the best work experience possible and that's why we have developed close partnerships with local, regional and national businesses.

There's no substitute for trying things out for yourself and work experience gives you the chance to put your theoretical knowledge into practice. You might be offered the chance to visit a company, do an internship, or work on a real life project.

It means you leave with a qualification that demonstrates you have the knowledge, skills and attitude you need to be ready for work and are in the best position to get the job you really want.
