

The Course

In brief...

Advanced Apprenticeships are a popular choice for young people aged 16 - 24 looking to become fully qualified in their chosen field whilst earning a wage. Your training will be directly linked to the career you have chosen, gaining practical experience in the workplace, backed up by attendance at college on one day per week.

An Advanced Apprenticeship in Engineering will develop your employability skills and give you valuable experience of a variety of engineering related activities. You will be working in a workshop environment where your duties could encompass many areas of work such as manual machining, CNC and CAD. Your exact duties will depend upon your employer.

Where possible staff from College Work Based Learning will assist in finding you an employer and a place of work (although students who are already employed are welcome to apply if sponsored by their employer). Your offer of an Advanced Apprenticeship will be dependent upon suitable work placements being available.

What the Course Leads to

What courses can I do after this?

On successful completion of this Advanced Apprenticeship in Engineering (Level 3), you could progress in your chosen career into Higher Education on a HNC/HND or Foundation or Honours Degree.

Progression onto Higher Apprenticeship Framework Level 4 is also an option.

What do I need to apply

To do this course you should have...

A minimum of 4/5 GCSEs at grade A*-C including English and Maths and Science is desirable, however all applicants are encouraged to apply and suitability will be determined at interview.

You must have good practical skills and work carefully and methodically.

Applicants should demonstrate an active interest in working in an engineering environment.
