## Marine Technology facilities

Marine is a fast-growing industry and demand is high for fully trained staff. There a number of diverse career opportunities available in the leisure, commercial and superyacht industry. We work closely with world-leading marine employers such as Sunseeker to ensure the training we're delivering meets the needs of the industry.

### Marine facilities:

- We have everything you would expect to find on a boat except the water!
- 20 working marine engines - inboard and outboard
- 3 (soon to be 4!) complete working steering helms from makers such as Simrad, Raymarine & Garmin
- VHF sets, GPS, AIS (Automatic Identification Systems), Radar, Autopilots, Flux-Gates & Rate Sensors, along with all the electrical systems associated with this equipment like Chargers, Inverters & Power Distribution
- Fully working training systems for PLC's (Programmable Logic Comptrollers), Hydraulics and Audio-Visual installations on all types of marine craft

There is pretty much nothing you will find out about, that we do not have a working example of.
