

The Course

In brief...

Apprenticeships are a popular choice for young people aged 16 - 24 looking for on-the-job training and the opportunity to gain nationally recognised qualifications whilst earning a wage. Most of your training will be directly linked to the career you have chosen, gaining practical experience in the workplace, backed up by attendance at college one day a week.

An Apprenticeship in Marine Engineering will develop your employability skills and give you valuable experience in Marine Engineering and related activities. You will be working in a workshop environment where your duties could encompass many areas of work such as repair and maintenance of inboard and outboard engines, assembly and installation, hydraulics and propulsion systems. Your exact duties will depend upon your employer.

Where possible staff from College Work Based Learning will assist in finding you an employer and a place of work (although students who are already employed are welcome to apply if sponsored by their employer).

Your offer of Apprenticeship training will be dependent upon work placements being available.

Apprenticeships are a great option for school leavers who want to get straight onto the career ladder. An Apprenticeship is equivalent to 5 GCSE's.

What the Course Leads to

What courses can I do after this?

On successful completion of an Apprenticeship in Marine Engineering (Level 2). You could progress in your chosen career onto an Advanced Apprenticeship in Marine Engineering (Level 3).

What do I need to apply

To do this course you should have...

Candidates for the apprenticeship will require GCSE's in English, maths and a Science based subject at grades C.

All applicants for apprenticeship training will be required to attend an assessment and interview.

International entry requirements

If English is not your first language, you will need an IELTS (Academic) 5.5 or equivalent that is approved by the Home Office which is available at www.gov.uk
