

Marine Engineering - Level 3 Technical Certificate in Marine Construction, Systems Engineering and Maintenance Electrical and Engineering Evening Course Electrical and Mechanical

Inspiring Lives, Discovering Futures

The Course

In brief...

This two year, 1 evening per week course will further your skills and knowledge in Marine Electrical Installation & Engine Maintenance, and is aimed at candidates with some previous experience or knowledge in marine, and/or an electrical/mechanical discipline.

You will be working in a classroom and workshop environment where your duties will encompass many areas of work such as installation and identification of equipment, materials and components and the principles that govern the electrical supply systems installed and used on small to medium leisure craft. As well as developing a detailed knowledge and understanding of marine engines and their auxillary systems.

What the Course Leads to

What courses can I do after this?

On successful completion of your Certificate in Marine Electrical Systems, Engineering and Maintenance, you can progress in your chosen career.

What do I need to apply

To do this course you should have...

Previous experience or knowledge within the marine industry, and/or an electrical/mechanical discipline.
