

The Course

In brief...

Apprenticeships are a popular choice for people looking for on-the-job training and the opportunity to gain nationally-recognised qualifications whilst earning a wage. Most of your training will be directly linked to the career you have chosen, gaining practical experience in the workplace, backed up by attendance at college just one day a week.

An Advanced Apprenticeship in Vehicle Maintenance and Repair will develop your employability skills and give you valuable experience of a variety of maintenance and repair activities. You will be working in a workshop environment where your duties could encompass many areas of garage work such as servicing, and the diagnosis and rectification of engine, chassis, electrical and transmission components from light vehicles. Health and Safety and housekeeping are also important parts of the qualification. Your exact duties will depend upon your employer.

Where possible staff from College Apprenticeships Training will assist in finding you an employer and a place of work (although students who are already employed are welcome to apply if sponsored by their employer). Your offer of Apprenticeship training will be dependent upon work placements being available.

Apprenticeships are a great option for school leavers who want to get straight onto the career ladder.

What the Course Leads to

What courses can I do after this?

What do I need to apply

To do this course you should have...

Entrants should possess GCSE's in English, Maths and a Science-based subject at grades A to C. It is strongly recommended that entrants have completed an Apprenticeship in Vehicle Maintenance and Repair at level 2 prior to commencing a Level 3 Apprenticeship. All applicants for Apprenticeship training will be required to attend an assessment and interview.
