

The Course

In brief...

The environment is currently facing the biggest challenge it has ever seen. Everyone has the power to make a difference and create a more sustainable future for the next generation. This fully online level 2 Certificate in Understanding Climate Change and Environmental Awareness will teach you all about the principles of climate change so you can drive positive change and become 'greener' in the workplace and at home. You will learn about the impact of pollution, the barriers to a sustainable future and how to challenge these barriers. The qualification also covers the advantages of renewable energy and how to reduce energy consumption and carbon footprints for a better world for all.

Please Apply Now using our Online Enquiry Form - Web link <https://www.thecollege.co.uk/adult-skills/free-online-courses>

Our Enrolment Process is complete online and you will be assisted every step of the way by one of our team members.

If you require any further information, please call James Sewell on direct line 01202 205800 or email on sewellj@bpc.ac.uk

Who is it for?

Whether you're interested in learning for work, career progression or self-development, our range of nationally recognised courses provide a flexible blended approach to your learning.

For each qualification the learner receives a hard copy/learning pack, which contains all the theory and knowledge a learner will need to achieve these Level 2 qualifications. We use an online learning platform known as eAssessor to submit your answers to the course, the course is broken into topics/sections and you submit your studies to your assessor for feedback as you work your way through.
