No matter what level you are currently working at, we can help you achieve your goals

Everything we do here at The College ensures that you become qualified, find a job, keep it and progress in your career.

That's why we offer expert support in English and maths. No matter what level you are currently working at, we can help you to achieve your goals. When you leave The College, you'll have the tools and skills you need to be successful.

A wide number of jobs require you to have achieved at least a grade 9-4 (formerly A*-C) at GCSE in both maths and English. Although they are not seen as the most 'fun' subjects, they are extremely important, and are certainly helpful in everyday life too.

As part of studying at The College, we work with every student to develop an individual learning plan that considers their long- and short-term goals. If getting a qualification in English and Maths alongside your main course is your ambition, please speak to the curriculum area that you are interested in. They will be more than happy to support you in this.
